Ford Pro™ Telematics: Acceleration & Top Speed Limiters

Manage Driver Behavior

Ford Pro™ Telematics¹ Acceleration Limiter² and Top Speed Limiter² allow fleet managers to set acceleration and speed limits for fleet vehicles remotely to help **promote responsible driving behaviors**, which may help contribute to **lower operating costs**.

1. Available on vehicles with embedded modem or equipped with approved plug-in device (PID). May require modem activation. Ford Pro Telematics and Ford Pro Data Services require a purchased subscription. Terms and conditions apply. Telematics service and features, and access to vehicle data, depend on subscription and compatible cellular network availability. Evolving technology/cellular networks/vehicle capability may limit functionality and prevent operation of connected features. 2. Optional add-on. Currently available on select vehicles and trims. See your Ford dealer for details.

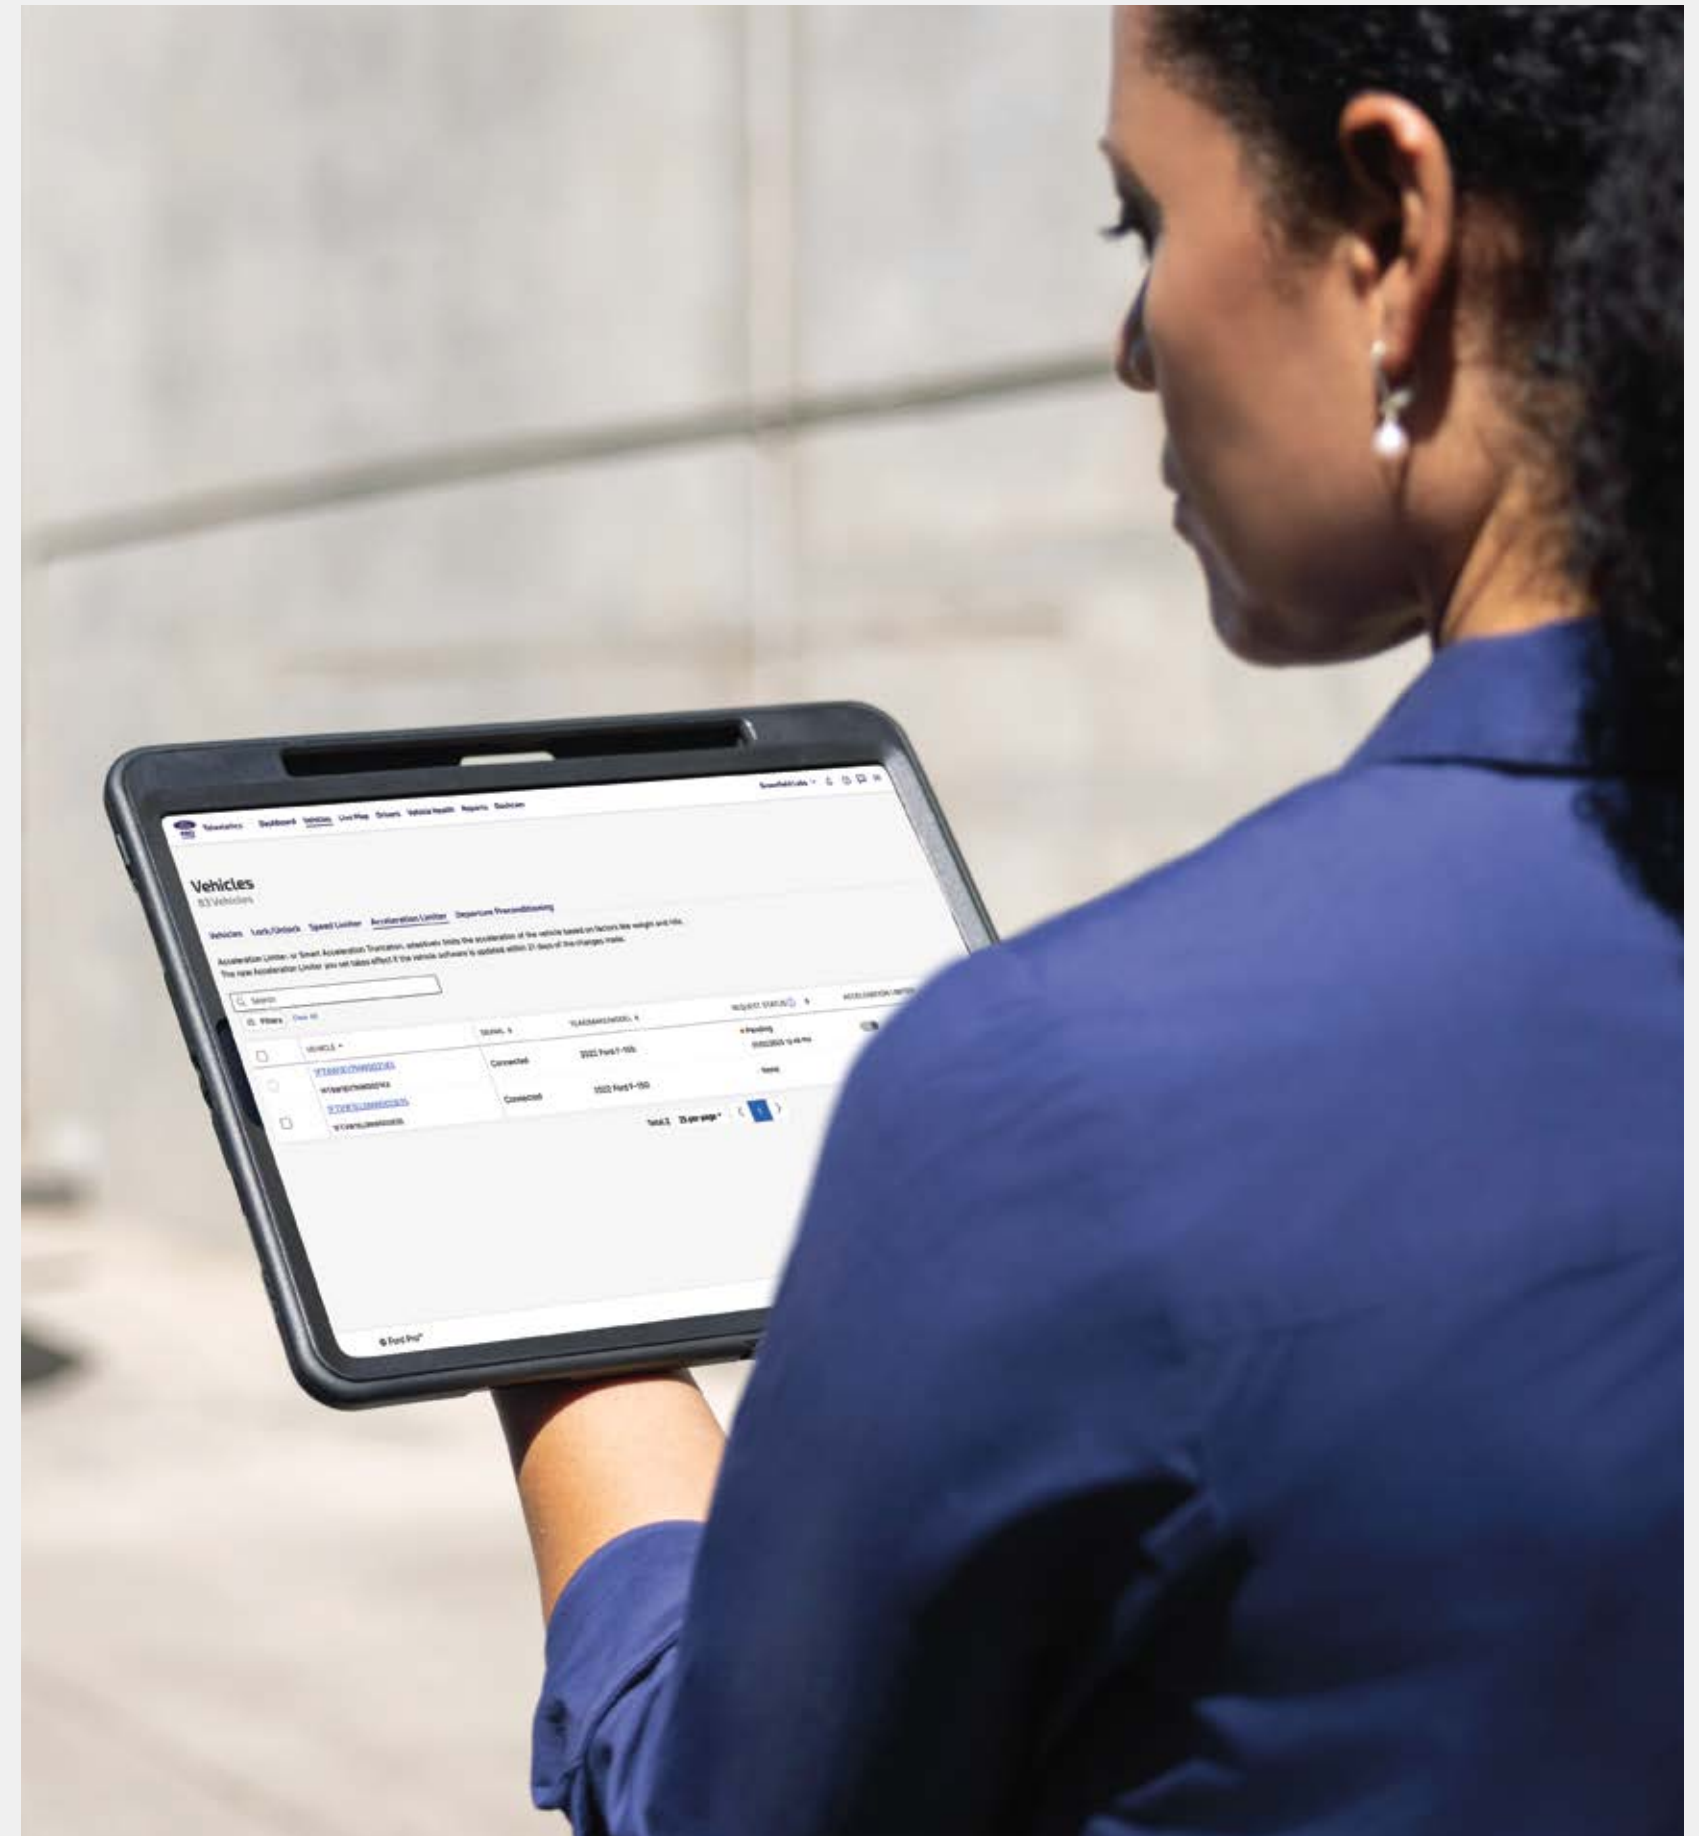

Acceleration Limiter

With the Ford Pro™ Telematics add-on feature **Acceleration Limiter**,¹ fleet managers can set acceleration limits to help **promote smooth acceleration** and prevent drivers from accelerating harshly.

Limiting harsh acceleration can help decrease stress on components like the engine, transmission, brakes, and tires, which could contribute to longer service intervals and **lower maintenance needs**.

1. Currently available on select vehicles and trims. See your Ford dealer for details.

Screens shown are subject to change.

Top Speed Limiter

By using the **Top Speed Limiter** add-on feature,¹ fleet managers can **set a maximum speed** that limits how fast a vehicle can travel, without installing additional hardware. Through Ford Pro™ Telematics, a top speed limit can be set for 65, 70 or 75 miles per hour.²

By capping maximum speed, fleet managers can **encourage responsible driving habits**, and help to minimize speeding violations.

1. Currently available on select vehicles and trims. See your Ford dealer for details. 2. Speed limits offered may vary by vehicle and market.

Screens shown are subject to change.

How Do I Access These Features

Once vehicles are enrolled in Ford Pro™ Telematics and the available Acceleration Limiter and Top Speed Limiter add-on features,¹ managers can enable these features remotely through the software. Set one vehicle at a time, or multiple vehicles at once. And with **no additional hardware** required on the vehicles, implementing these features is **a seamless process**.

Enrolling in Acceleration & Top Speed Limiters

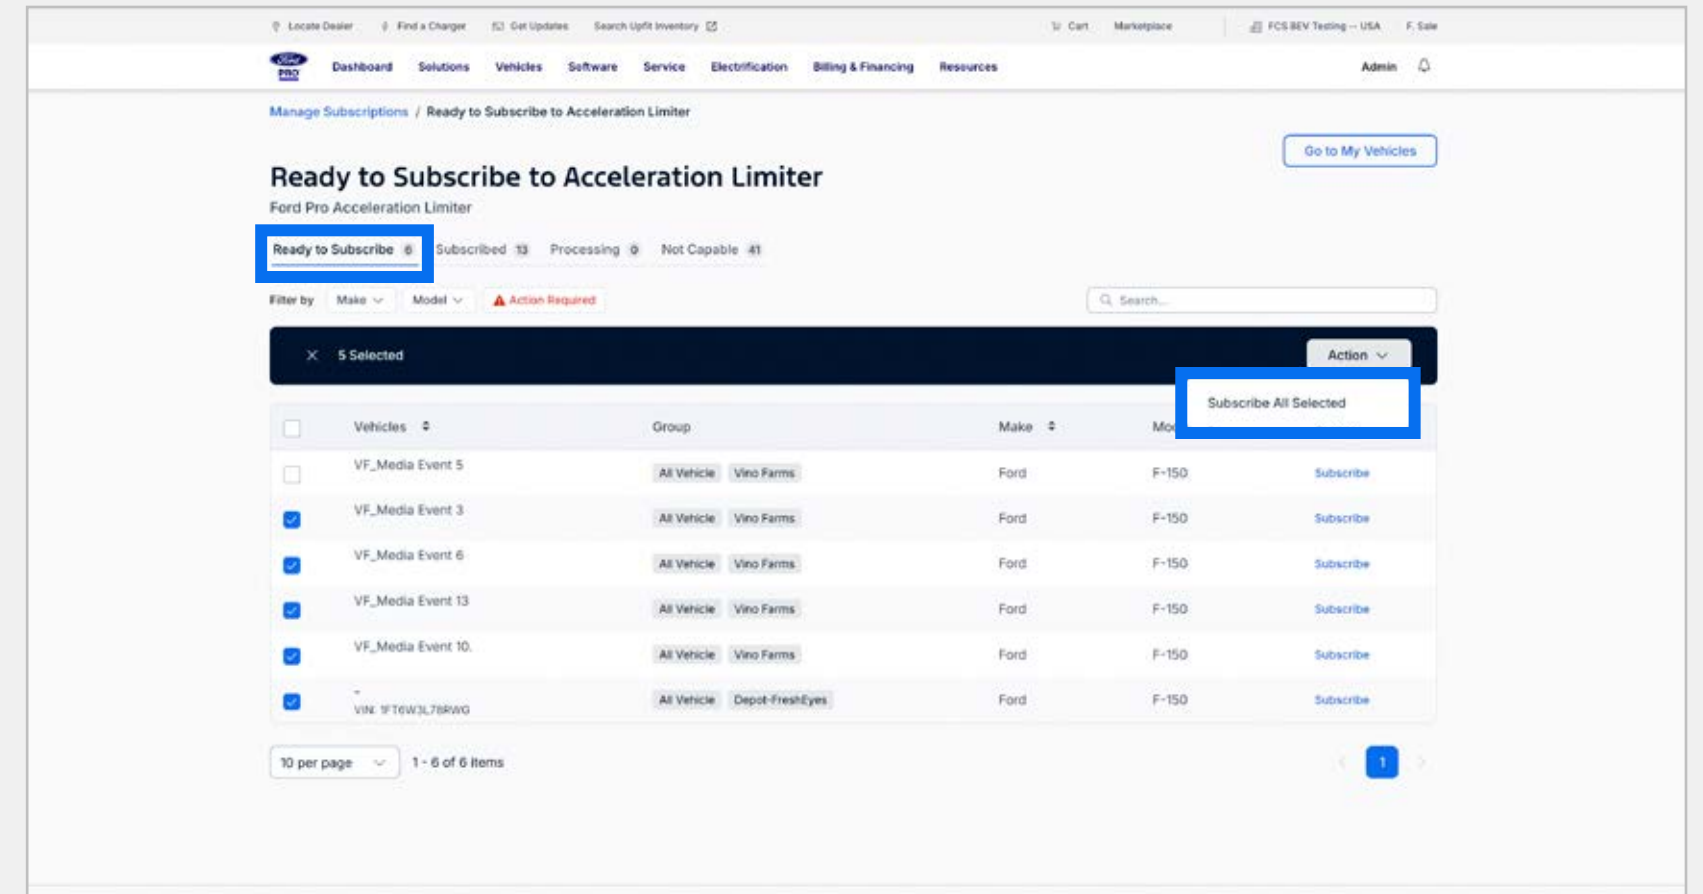

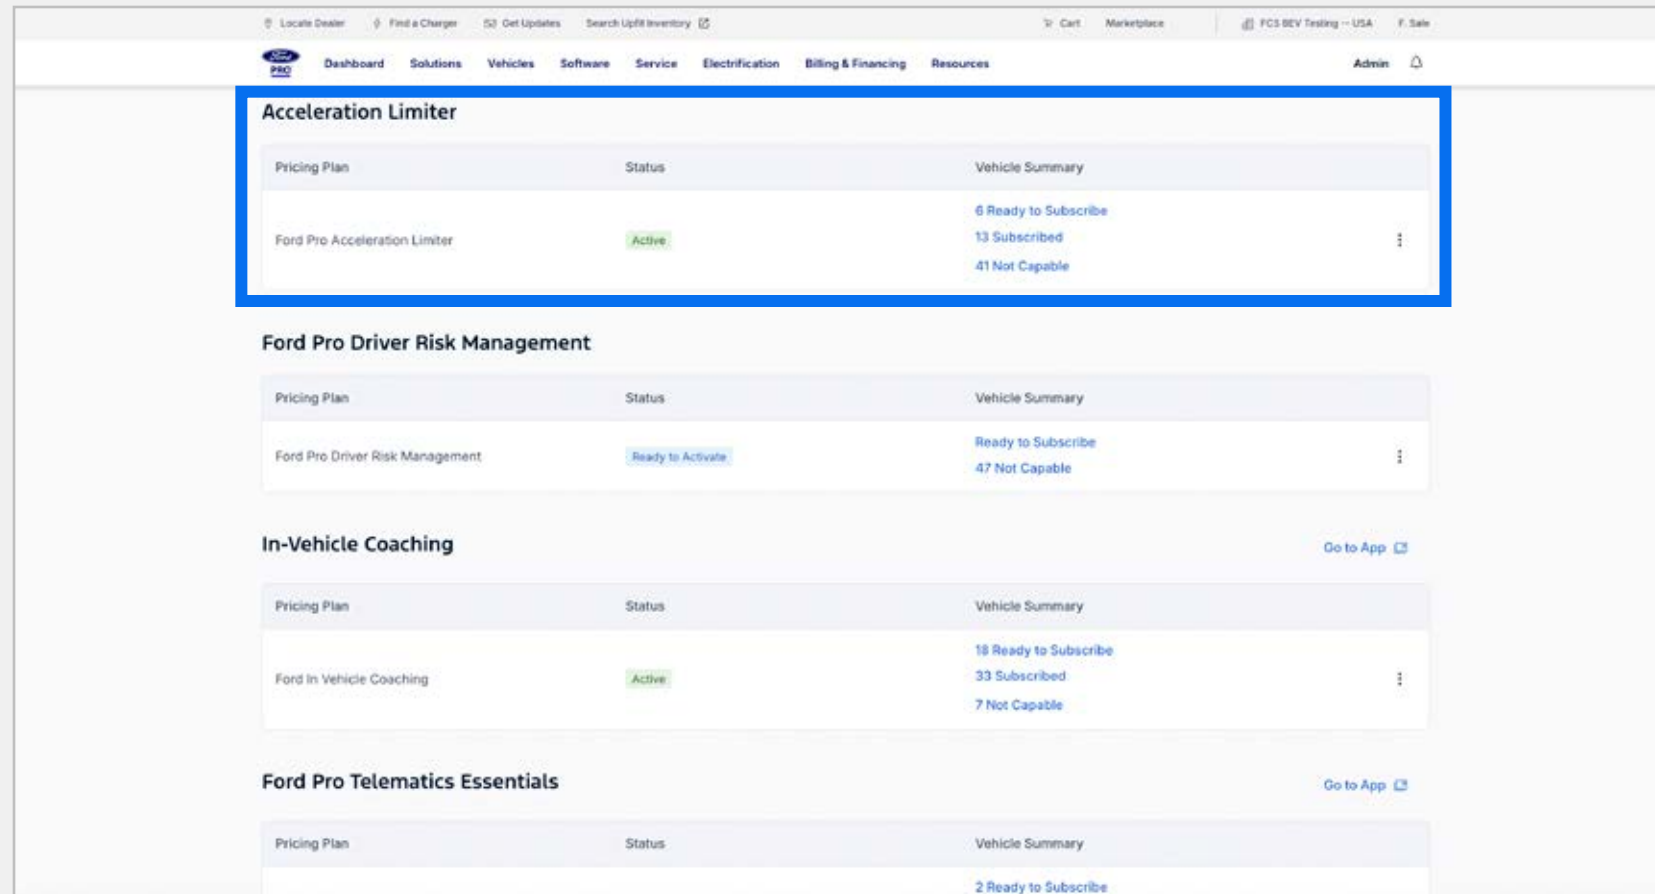

Before setting limits, vehicles must be enrolled in the appropriate services via the Ford Pro™ website.

Follow these steps:

- ▶ Log in to your **Ford Pro account**.
- ▶ From the Ford Pro Dashboard, click on **Marketplace** at the top of the screen.
- ▶ Scroll down until you find the **Acceleration Limiter** and/or **Top Speed Limiter** squares and click on **Add to Account**. Fill in the billing information and follow the prompts to add the product to your account.

Enrolling in Acceleration & Top Speed Limiters (cont.)

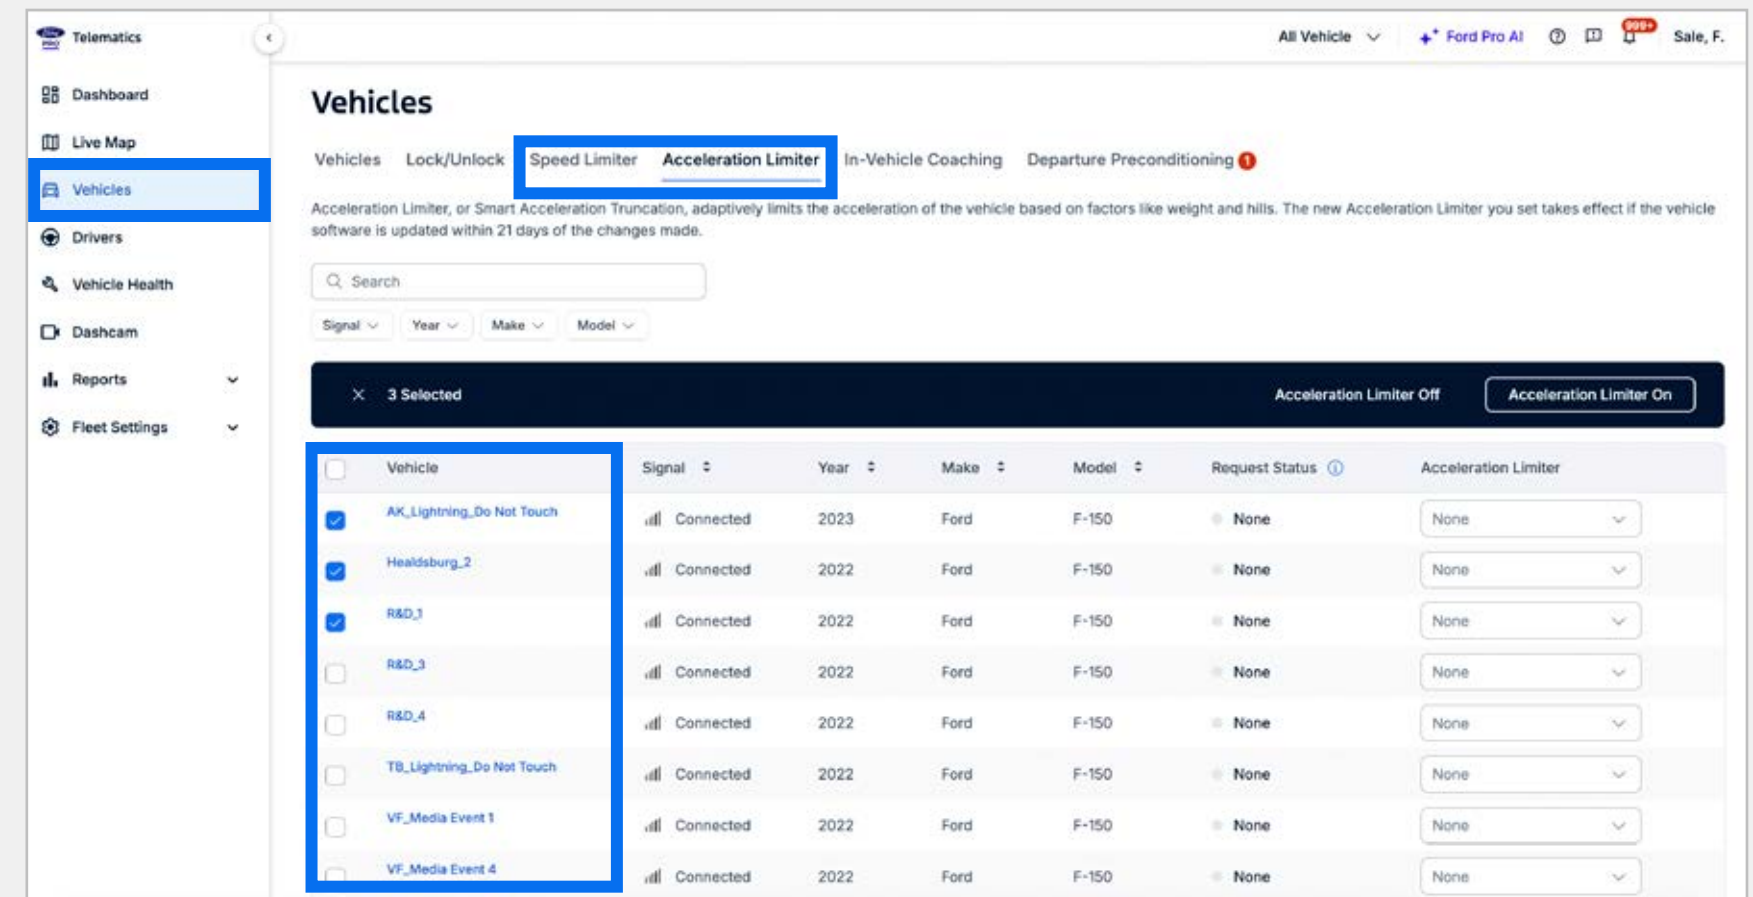

- ▶ Return to your **Ford Pro™ Dashboard** and click on **Manage Subscriptions**.
- ▶ Scroll down until you find **Acceleration Limiter** and/or **Top Speed Limiter**.

- ▶ You will see how many of your fleet vehicles are ready to subscribe, are subscribed, and are not capable. Click on **Ready to Subscribe**.
- ▶ On the **Ready to Subscribe** screen, choose the vehicles you would like to subscribe, then choose **Subscribe All Selected** from the **Action** pull down menu.

Setting Up Acceleration & Top Speed Limiters

Once the subscription is active, follow these steps to apply specific limits to your fleet from the Ford Pro™ Telematics dashboard.

- ▶ **Navigate to Vehicles:** From the dashboard, go to the **Vehicles** tab.
- ▶ **Choose Limiter Tab:** Select either the **Speed Limiter** or **Acceleration Limiter** tab to view the vehicle information table.
- ▶ **Select Target Vehicles:** Choose the **single vehicle** or **multiple vehicles** you wish to update.
- ▶ **Review Requirements:** Before sending the command, ensure the following conditions are met:
 - ▶ **Operator Notification:** You must inform vehicle operators of the limit change.
 - ▶ **Battery Charge:** The vehicle must have sufficient total battery charge for the update.
 - ▶ **No Pending Updates:** There should be no other pending software updates.

- Send Limiter: Confirm the desired speed/limit and press **Send Limiter** or **Set Limiter**.

► Software Update Window: The status will change to **Pending**. The limit will take effect via a software update, which can take up to **21 days** to complete.
- Final Confirmation: Ensure the vehicle has a software update schedule set in its settings. Once the installation is finished, the status will change to **Success**.
